**Abstract:** PROBLEM TO BE SOLVED: To provide a control system for a color printer or a copying machine including a user interface for selectively adjusting the output of a print.

**SOLUTION:** This system is provided with the display of a color spectrum which shows the color range of the output to the user and which can be adjusted. The user interface includes the display device of a command inputted by a user and performs selection control showing the effect of the command of the user in terms of the output. By dynamic picture display showing the effect of the output of the print, the adjustment of the appearance of the print output corresponding to the performance of the command of the user is simultaneously transmitted.
